

WATER CONSERVATION

FRIENDLY REMINDER

Dear Customer:

This notice serves to remind customers that outdoor watering from public water systems for the purpose of irrigating, regardless of method, lawns, gardens, trees, grass, shrubbery or other vegetation is not allowed between the hours of 1:00 PM and 5:00 PM, all year. Allowing water to pool, pond or runoff your property due to over-watering is illegal.

To reduce the impact on your water supply during the expected high heat of summer, we respectfully request your cooperation in conserving water by observing the following voluntary watering schedule, effective June 1, 2007 through October 31, 2007:

- **The irrigation of lawns, gardens, trees, grass, shrubbery or other vegetation located on premises having an odd-numbered address shall be limited to watering on Tuesday, Thursday, and Sunday.**
- **The irrigation of lawns, gardens, trees, grass, shrubbery or other vegetation located on premises having an even-numbered address shall be limited to watering on Monday, Wednesday, and Saturday.**

We also request that customers do not plant new lawns between July 1st and September 30th.

Your cooperation in practicing good water conservation measures has a significant impact on the operation of your water system.
