

Roadmap to Recovery for Nevada

Guest Rooms

Mandatory*

Recommended Best Practices*

Employees

- Ensure minimum 6 feet between people, if not possible, install barriers.
- Face coverings are required for all employees, including disposable gloves.
- Employees must perform daily symptom assessment.**
- Require employees to stay home if symptomatic.
- Require regular handwashing.
- Place hand sanitizers in high-contact locations.

- Face coverings are recommended for guests.

Shift Pattern

- Ensure minimum 6 feet between people, if not possible, install barriers.
- Alternate end-of-day shift changes for social distancing.
- Limit number of employees on employee elevators.
- Clean and disinfect high-contact areas (e.g. door handles, elevator controls, etc.).

- Provide hand sanitizer stations on each floor.

Physical Spaces/ Guest Rooms

- Ensure minimum 6 feet between people.
- Post social distancing signage and disinfect high-contact surfaces hourly.
- Wash as much of the linen that comes in contact with guests. Items that cannot be easily washed, like comforters and pillows, should be enclosed in coverings that are washed after each guest.
- Disinfect high touched areas, taps, faucets, door and drawer handles, door latches, toilet or bath rails, telephones, thermostats, rails on balconies, light and lamp switches, remote control, curtain pulls and wands, guest information books, alarm clocks, hair dryers, irons and pens.
- Use disinfectants outlined on [EPA List N](#).

- Carpet should be cleaned in a 3-step process:
 1. Detergent and hot water
 2. Disinfectant
 3. Steam.
- Disinfect soft furnishings.
- Provide disposable plates, cups, utensils, etc. for in-room dining.
- Remove hard-to-clean decorative pillows.

Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shut down any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on [EPA List N](#).
- Remove all linens.

- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.
- Wear proper PPE while deep cleaning and disinfecting.
- Dispose of all paper products (e.g. coffee filters, tissues, cups, magazines, etc.).
- Minimize exposure by delaying time before entering exposed room for deep cleaning.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), [Nevada OSHA](#), and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.
