

# IMPLEMENTATION ELEMENT

DRAFT  
AUGUST 2017

# IMPLEMENTATION ELEMENT

## PURPOSE

The purpose of the Implementation Element is to set forth the Master Plan work program for the next five to ten years.

## MASTER PLAN ACTION MATRIX

The Action Matrix for the 2016 update of the Douglas County Master Plan lists the goals and actions for each Master Plan Element along with the responsible party and target dates. The Action Matrix also identifies actions which will require amendments to the Douglas County Development Code as well as actions that need to be included in the County's five-year Capital Improvement Program.

## MASTER PLAN ANNUAL REPORTS AND ACCOMPLISHMENTS

The Planning Commission is required to submit an annual report to the Board of Commissioners on the implementation status of the Master Plan (NRS 278.190). When the 2011 Master Plan (15-year update) was adopted on March 1, 2012, it contained 95 actions. When the South Shore Area Plan was adopted by the County in 2013, 11 more actions were added, increasing the total to 106 actions.

The Planning Commission has submitted four annual reports ([2012](#), 2013, 2014, 2015) to the Board of Commissioners on the implementation status of each action. The 2015 Annual Report stated that 22 actions had been completed, 33 actions were underway, and 51 had not been started yet. An annual report was not prepared for calendar year 2016 due to the preparation of the five-year update of the Master Plan.

Appendix A provides information on Master Plan Accomplishments since the adoption of the original Master Plan in 1996.

## MASTER PLAN AMENDMENTS

Master Plan amendments can be initiated by the Douglas County Community Development Department (as in the case of five year updates), or by individual property owners. Master Plan Amendments are required for any proposals to change the future land use designation on the future land use maps, to change water or wastewater service boundaries or the urban service area boundary, as well as to change any goals, policies, or actions in the adopted Master Plan.

To amend the Master Plan, an applicant must meet the four findings specified in Section 20.608.040 of the Douglas County Code:

1. The proposed amendment is consistent with the policies embodied in the adopted master plan and the applicant has demonstrated the amendment proposes the overall goals and objectives of the master plan and has demonstrated a change in circumstances since the adoption of the plan that makes it appropriate to reconsider one or more of the goals and objectives or land use designations.
2. The proposed amendment is based on a demonstrated need for additional land to be used for the proposed use, and that the demand cannot be reasonably accommodated within the current boundaries of the area.
3. The proposed amendment would not materially affect the availability, adequacy, or level of service of any public improvement serving people outside of the applicant's property and will not be inconsistent with the adequate public facilities policies contained in Chapter 20.100 of Title 20.

4. The proposed amendment is compatible with the actual and master planned use of the adjacent properties and reflects a logical change to the boundaries of the area in that it allows infrastructure to be extended in efficient increments and patterns, it creates a perceivable community edge as strong as the one it replaces, and it maintains relatively compact development patterns.

The Planning Commission is responsible for reviewing Master Plan Map and Text Amendments and forwarding a recommendation of approval or denial to the Board of Commissioners. A three-fifths majority vote is required for approval.

Appendix B provides a listing of all Master Plan Amendments submitted after the adoption of the original Master Plan in 1996.
